SPECIAL INDUSTRY LINE

The production cycle starts with assisting the customer in the choice of material used to make the prototype, and ends after the final testing with the finished product being delivered to the customer.

Production is organized so as to produce an endless number of articles with standard measurements, such as, for example, pipe insulation elements for industrial and civil insulation, for flue fittings, both naked and lined, the elbows, gaskets and flexible polyurethane foam for soundproofing. The company also specializes in the manufacture of articles made according to customer specifications and intended for the insulation of fire doors, thermo-technical equipment (ovens, boilers, air treatment units, etc.), household appliances, (refrigerators, dishwashers, built-in ovens, etc.), automotive parts, (automobiles, RVs, agricultural machinery, etc.), railway components (passenger cars) and many other hi-tech applications.

Basic articles processed:

- Fiberglass
- Rockwool
- Needle-punch fabric fiberglass treated on both sides with an exclusive anti-dusting formula
- Ceramic fiber
- Polyethylene
- Polyester
- Synthetic rubber
- Foam polystyrene
- Extruded polystyrene
- Polyurethane

SPECIAL INDUSTRY LINE

ECOTEX BIHT SCREEN is a multi-purpose hi-tech insulating product obtained from the formulated union of certain inorganic raw materials, subjected to a series of special treatments. The produced heterogeneous material consists of: vermiculite, needle-punch felts, cellulose by-products, alumina and catalyst-coated polyurethane polymers. Ecotex Biht Screen is absolutely innovative since it groups together many important characteristics in a single product, more than any other known insulating product can boast. This is why it can be rightfully considered a significant innovation. Ecotex Biht Screen is manufactured in compliance with all European Community regulations in force, with special focus on health and on the environment.
