# INDUSTRY & PLANT ENGINEERING CATALOGUE

## BERGAMO ISOLANTI, THE BEST PRODUCTS AND SYSTEMS FOR INSULATION

Creativity, professionalism and excellence, for the past 50 years

**Bergamo Isolanti Spa** began its business in Bergamo in 1974 and has since been a leader in the industry in Italy and Europe for the supply of insulation products for every sector. Bergamo Isolanti features a special line entirely dedicated to the insulation of industrial, plumbing and heating systems and general equipment. In addition to dealing with some of the best brand products on the market, the company manufactures its own products which always guarantee the best possible results thanks to decades of experience. The offices in Bergamo (1974), Milan (1983), and Brescia (1996) work hand in hand to provide customers with impeccable products and tailor-made solutions, thanks to continuous research that has led to the development of innovative products. The company is perfectly organised to supply customers of any size.

OUR VALUES

- Our insulation products guarantee:**
- Efficiency** - high increase in plant yield thanks to the elimination of energy loss
  - Energy savings** - less energy used thanks to the high degree of insulation
  - Safety** - protection from burning surfaces of technological and fire-fighting installations
  - Environment** - respected thanks to environmentally sustainable production lines
  - Comfort** - high level of protection from heat, cold and noise

PRODUCTION AND DISTRIBUTION OF MULTI-SECTOR INSULATING PRODUCTS FOR GENERAL INSULATION

A customised line of products and systems

Bergamo Isolanti boasts its own production of insulating products for industry. We produce standard and special products on request, with registered and patented trade-marks such as Coverbloc, Ecotex BIHT, Quadriefon, Lisciophon, Fonofloor, Fonostop, Piraphon, Bugnaphon, Isolmousse, etc.

## THE BEST INSULATION PRODUCTS MANUFACTURED AND DISTRIBUTED IN ITALY AND ABROAD

### A complete range suitable for insulation in all sectors

We are specialists both in our own production and in the distribution of national and international brand materials for heat, cold, acoustic, burn protection, fireproofing and smoke protection as well as complementary accessories.

Over the years, the company has focused on the industrial sector in general, with customised systems developed in-house through in-depth scientific research. To guarantee perfectly optimised insulating products, we provide customer support that starts from participation in the development of the applied technologies, to the selection of materials from which the prototype is made and through to the delivery of the finished product, when the product has passed efficiency testing.

Production is structured to manufacture a multitude of products designed and developed to standard sizes: insulating pipe sections and smoke systems, bends, seals, flexible foams, soundproofing and shockproofing panels and screens are just some of the products manufactured in the Bergamo Isolanti factory. We also specialise in the production of special customised materials, according to the customer's design, for the insulation of fire doors, thermo-technical equipment (ovens, etc., boilers, etc.), household appliances (refrigerators, dishwashers, built-in ovens, etc.), vending machines, automotive parts (cars, caravans, etc.), railway parts (passenger coaches) and other hi-tech applications. All Bergamo Isolanti products can be immediately manufactured in the customer's production process.

All our production is dedicated to the processing of basic products made from glass and rock mineral wool, needle punched textile glass wool, ceramic fibre, polyethylene, polyester, synthetic rubber, sintered polystyrene and polyurethane.

## INSULATION OF PIPING, EQUIPMENT, DUCTING AND GENERAL PLANT ENGINEERING FROM LOW TO MEDIUM-HIGH TEMPERATURES

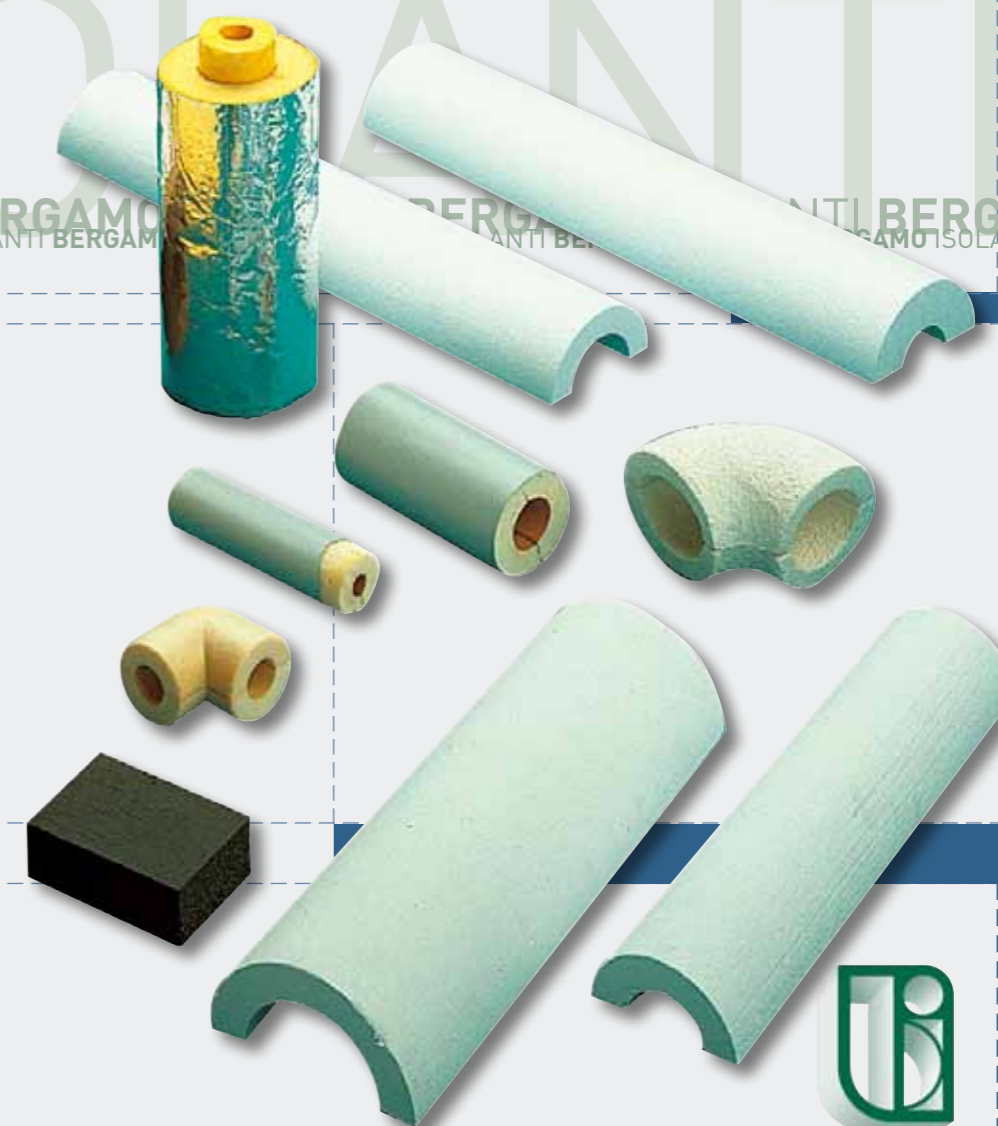

### Elastomeric and polyethylene insulation foams

Tubes  
Sheets  
Rolls  
Processed on request  
Complementary accessories

### Polyurethane - Polystyrene foam - cellular glass

Pipe sections and bends  
Sheets  
Complementary accessories

## INSULATION OF PIPING, EQUIPMENT, DUCTING AND GENERAL PLANT ENGINEERING FROM MEDIUM-HIGH TO HIGH TEMPERATURES

### Glass and rock mineral wool

Mats  
Panels  
Pipe sections  
Processed on request  
Complementary accessories

Mineral wool pipe sections and bends certified under our own registered brand, complementary accessories.  
(see separate catalogue)

**COVERBLOC**

## INSULATION OF EQUIPMENT AND PLANT ENGINEERING PARTS AT VERY HIGH TEMPERATURES

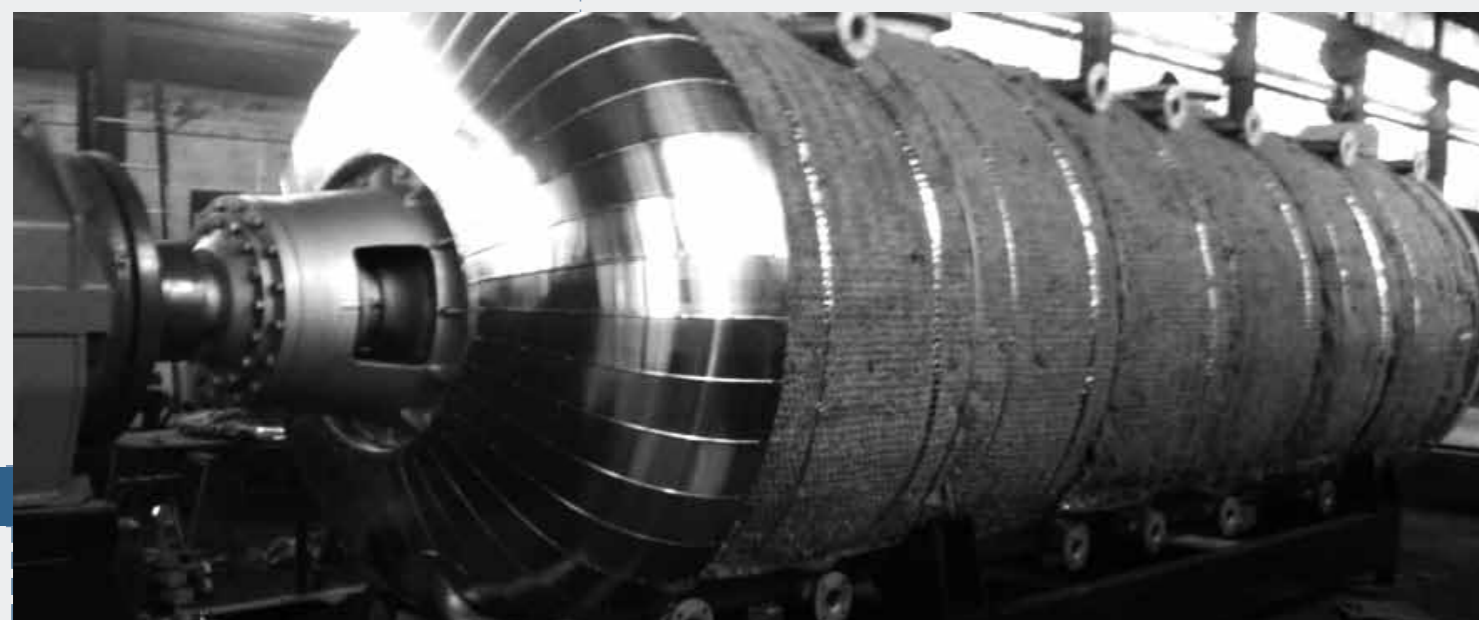

**Needle punched textile glass wool and ceramic fibre**

Mats

Panels

Processed on request

Complementary accessories

## INSULATION OF TIE-RODS AND STRUCTURES FOR FIRE PROTECTION

**Calcium silicate**

Pipe sections and bends

Sheets

Complementary accessories

## PROTECTIVE FINISHES FOR PIPING, EQUIPMENT AND GENERAL PLANT ENGINEERING FROM LOW TO MEDIUM-HIGH TEMPERATURES

### PVC plastic laminates

Sheet  
Pre-formed bends  
Special pieces  
Complementary accessories

## PROTECTIVE FINISHES FOR PIPING, EQUIPMENT, DUCTING AND GENERAL PLANT ENGINEERING UP TO VERY HIGH TEMPERATURES

### Galvanised – stainless steel aluminium laminates

Coils  
Pre-formed shells and bends  
Special pieces  
Complementary accessories

## INSULATION OF EQUIPMENT AND PLANT ENGINEERING PARTS AT VERY HIGH TEMPERATURES

**Needle punched textile fibre with special anti-dust formulation**  
Shapes on request  
(own brand certified product - see separate catalogue)

**ECOTEX BIHT™**

## ACOUSTIC CORRECTION - SOUND-ABSORBING AND ANTI-REVERBERATION TREATMENT OF ROOMS, VIBRATION DAMPING AND SOUND INSULATING TREATMENT FOR PLANTS AND EQUIPMENT

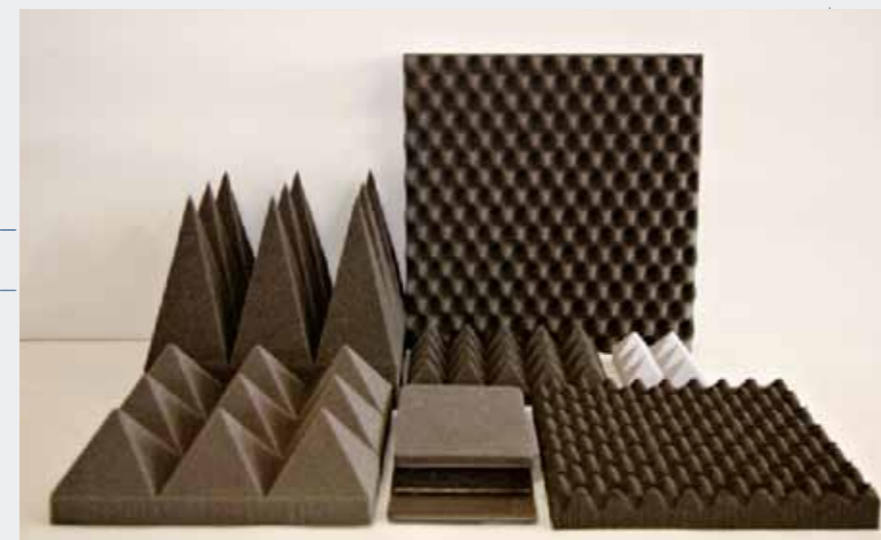

Sound-absorbing panel/board/screen for modifying the sound field of acoustically poor environments even when fitted for anti-reverberation treatment. Suitable for acoustic correction in open-plan offices between workstations, meeting rooms, cafeterias, partitions between machine tools, etc.  
(own brand certified product - see separate catalogue)

**QuadrieFon**

**Flexible foams and filled synthetic rubber**  
Pyramid panels  
Embossed panels  
Shapes on request  
Complementary accessories

## SMOKE SYSTEMS - INTERNALLY INSULATED SMOKE EVACUATION CHIMNEYS

### Single and double wall stainless steel chimneys

Steel tubes and bends

Coverbloc pipe sections and bends (own brand certified product - see separate catalogue)

Special pieces

Complementary accessories

## INSULATION AT ENCLOSURES AND EQUIPMENT WITH SPECIAL SHAPES

### Flexible elastomeric seals in PVC, polyethylene, polyester and synthetic rubber

Rolls in thicknesses and sizes on request

MULTI-PURPOSE SYNERGISTIC PRODUCTS  
AND COMPLEMENTARY ACCESSORIES

Products to complete the range

- Adhesive tapes
- Bituminous boards
- Aluminium terminals
- Self-tapping screws
- Galvanised iron wire
- Glass veils and fabrics
- Twisted insulating rope
- Moulded polystyrene embossed panels for radiant pipes for underfloor heating
- Chemicals for fibreglass product fabrication
- Merit program software

BERGAMO ISOLANTI SPA BRANDS

## OUR HISTORY, OUR MISSION...

The history of Bergamo Isolanti has deep roots in the flourishing economy of the Lombardy province. In 1974, the founder, who still presides over the company today, put years of family experience in the insulation materials sector to good use and founded the company, establishing its first headquarters in Bergamo. At a time when industrial and general insulation was still in its pioneering stage, the company immediately sought excellence, focusing on the distribution of insulation materials for plants and industry, without forgetting the emerging field of thermal-acoustic building insulation. Thanks to the booming economy of the early 1980s, the company opened their Milan office (1983) and expanded the business, including the establishment of another office in Brescia (1996) shortly before becoming a joint-stock company in 1997. Throughout those years, which were characterised by a strong evolution of the market and sector products, Bergamo Isolanti stood out for its large-scale supply of insulating products for industry, plant engineering and construction. The insulation products distributed and manufactured by our company are the result of decades of experience and in-depth specialisation that has allowed us to become a leader in the industry. Every customer becomes a Bergamo Isolanti partner, developing a direct relationship with our company, which provides design support and aid in choosing the most suitable solutions and then continued, ongoing consultancy. Great results have been achieved through investments, innovation and the selection of trustworthy staff with a vast knowledge of materials as well as the sector. As proof of this, the company has served almost 30,000 customers, the result of established know-how and precise, creative service, which have allowed Bergamo Isolanti to cross Italy's borders and make its way into Europe. Today, exports account for more than a third of the company's turnover, demonstrating the global propensity for products that are always current and central to a future of efficiency and sustainability. Efficiency, with our customers' needs at the centre: our mission has become reality.

**Bergamo Isolanti Spa** offers qualified consultancy and the support necessary for correct use of its products, thanks to competent staff supported by experienced specialists for each component.
